Nature Nurture in Psychology | Simply Psychology Nature is what we think of as pre-wiring and is influenced by genetic inheritance and other biological factors. Nurture is generally taken as the influence of external factors after conception, e.g., the product of exposure, experience and learning on an individual. Nature and Nurture Debate - Genes or Environment? The nature vs nurture debate goes on and on, but still, it is a fact that we have traits that are predetermined by our genes, but we can still choose who we want to be as we travel through our lifetime. Nature versus nurture - Wikipedia The nature versus nurture debate involves whether human behavior is determined by the environment, either prenatal or during a person's life, or by a person's genes. The alliterative expression "nature and nurture" in English has been in use since at least the Elizabethan period and goes back to medieval French.

Nature vs. Nurture: Do Genes or Environment Matter More? Contemporary Views of Nature vs. Nurture Throughout the history of psychology , however, this debate has continued to stir up controversy. Eugenics, for example, was a movement heavily influenced by the nativist approach. Nature vs. Nurture - GoodTherapy.org Therapy Blog The nature vs. nurture debate is the scientific, cultural, and philosophical debate about whether human culture, behavior, and personality are caused primarily by nature or nurture. Nature vs Nurture - The Debate Examined - Difference and ... The nature versus nurture debate is about the relative influence of an individual's innate attributes as opposed to the experiences from the environment one is brought up in, in determining individual differences in physical and behavioral traits.

Nature vs. Nurture Theory Explained: Effects on Genes and ... The initial use of the Nature vs. Nurture Theory was credited to psychologist Sir Francis Galton in 1869 (Bynum, 2002). However, it is unclear who initially described the impact of genes and biology versus environmental influences.
